EDUCATION

University of Illinois at Urbana-Champaign

Urbana, IL

Bachelor of Science, Systems Engineering & Design and Computer Science + Economics

August 2025 - May 2029

Relevant Coursework: Novel Engineering, Technical Entrepreneurship, Discrete Structures

Activities: Off-Road Illini Baja SAE, Hive Society Improv Team, Sky Campus Happiness Volunteer

PROJECT HIGHLIGHTS

Dozed Smart Sleep App & Device - Mottier Innovation | Embedded Systems, Human-Centered Design, Cost Optimization

- Built a sleep-aware system with wearable PPG sensor, Raspberry Pi alarm triggering adaptive light/audio wake sequences.
- Led market research & cost analysis to evaluate product feasibility, target users & stakeholders, and pricing strategy, aligning technical design decisions with user needs and scalability.

Beau: Insurance Claim Assistant | Optical Character Recognition (OCR) and Large Language Models (LLM)

- Deployed a full-stack web app predicting medical claim approval/denial by analyzing treatment notes and insurance policies
- Implemented OCR-based document parsing, extract clinical details & validate coverage/exclusions/required documentation
- Designed a streamlined, step-by-step intake flow for patients and clinics, optimizing manual claim review

Published Research, Curieux Academic Journal | Research, Data Analysis, Technical Writing, Nanomaterials

- Authored "Unlocking the Versatility of Titanium Dioxide: Exploring Nanoparticle Structural Properties in Metal Oxides"
- Conducted analysis on structural properties of titanium dioxide nanoparticles and their impact on material strength and performance

PortaProfile - 2nd Place, Illinois Product Design Competition | Product Design, Prototyping, Cost Analysis, Marketing

- Developed a modular smart business card integrating QR and RFID technology for seamless professional networking
- Designed product concept, features, and feasibility & cost analysis: \$2-\$10 manufacturing cost using UIUC based cost estimation software

SKILLS

Programming Languages: Python, Java, C++, JavaScript, HTML, React, TypeScript, Kotlin

Frameworks/Tools: Certified Microsoft Office Specialist Expert (Excel, PowerPoint), Fusion, MATLAB, Market & Cost Analysis,

Languages: English, Spanish (basic), Gujarati (fluent), Hindi (basic), French (beginner)

EXPERIENCE

Strategy Analyst Avilux

Jan 2026 - Present

- Researched and presented regulations for drone food delivery

Autodesk Ambassador

June 2025 - Present

- Administered in-class workshops & tabling events locally, presented students with Autodesk resources and swag
- Facilitated coachings & presentations in Fusion, Sketchbook, AutoCAD

FIRST Robotics Team 7503 Frisco, TX Mechanical Team Member and Programmer

June 2023 - May 2025

- Built and assembled competition robots using Fusion, machining tools, and hand fabrication
- Wired electrical boards and programmed robot systems for movement and sensor functions

BSB Design, Frisco, TX - Job Shadow Intern

July 2024 - August 2024

- Observed architects, client communication, CAD workflows, & 4 project plans in home design industry
- Acquired knowledge in design revisions and 2D modeling translating client needs into final home plans

Abbott, Plano, TX - Independent Study and Mentorship Program

January 2024 - May 2024

- Studied thermodynamic systems under Mr. Jorge Rezende, Manager of Global Technical Support
- Pioneered a digital simulation of a 4-stroke Internal Combustion Engine on Fusion

Monster Mini Golf Frisco, TX - Team Member

June 2022 - November 2022

- Organized and coordinated 20+ mini golf stations, fixed arcade malfunctions & operated transaction counter
- Managed booking slots & time slots for customer events and parties
